

Convenient Operation Nutrition Powder Baby Rice Power Processing Line

1.Introduction Of Convenient Operation Nutrition Powder Baby Rice Power Processing Line

Instant Baby Cereal Powder Food Machine is researched and developed by our company based on the foreign advanced technology.

Instant Baby Cereal Powder Food Machine transforms the method from raw grains cooking into high-temperature and high-pressure method, and then is extruded within five seconds.

Meanwhile this processing line can denaturant the starch of the raw grains and be in favor of the absorption

Instant Nutrition Powder Baby Rice Power Processing Line has the higher nutrition than the traditional craft. Many food manufacturers adopt this kind of food equipment in the present

This Nutrition Powder Baby Rice Power Processing Line can product infant food, nutritional powder ,instant powder and so on.

2.Flow Chart Of Convenient Operation Nutrition Powder Baby Rice Power Processing Line

Mixer--Screw conveyor--Twin-screw extruder -- Air conveyor--
Dryer--Air conveyor--Milling system

Machine Name	Function
Mixer	Mix the material,make full mix
Screw Conveyor	Conveying the material into the extruder

Twin-Screw Extruder	Extruded the material,make it become the puffing fish food.
Air Conveyor	Conveying the product
Dryer	Baked the product, removing the surface's water
Milling System	Ground into a powder

3.Details Of Convenient Operation Nutrition Powder Baby Rice Power Processing Line

Model	Installed power	Real power	output	Dimension
LY 65	66kw	50kw	100-150kg/h	19000x1200x2200mm
LY 70	100kw	67kw	200-240kg/h	21000x1500x2200mm
LY 85	130kw	80kw	400-500kg/h	30000x3500x4300mm

4.Advantages Of Convenient Operation Nutrition Powder Baby Rice Power Processing Line

1. The motor of our extruder machine is Siemens Motor.
2. The raw material of our machines is Stainless Steel.
3. Our automatic machines are controled by frequency changer, it is easy to operate.
4. Our factory will send our engineer to install machines for you.
5. baked snack machine have the 12 months guarantee time.
6. The machine is multifunction. Many types of snacks can be manufactured by changing the die head and model.

6.Application Of Convenient Operation Nutrition Powder Baby Rice Power Processing Line

This process line uses rice,beans and all kinds of grains as raw materials.Through extruding,inflating,drying,crushing and mixing,it could produce many kinds of nutrition powder,such as baby rice powder,sesame pasta,beans powder and so on.This line could finish all the process automatically from the feeding to the end.It has features of easy operation,without leak of powder dust,sanitation,saving energy and easy to add all kinds of raw materials and nutriment.
