

Do You Know The Advantages Of Pet Feed Production Line?

This [pet feed production line](#) can make kinds of fish feed. At the same time, such as food fish, catfish, shrimps, crab, etc. And then, the fish food made by the fish feed making machine can float on water more than 24 hours. At the same time, gelatinization degree can reach 90%. At the same time, it can enhance the output of fodders. And then, it is suitable for making floating feed, pet food, fish fodder. At the same time, the diameter of particle is 0.6-16mm. And then, promising fodder output evenly and continuously.

Dog Food Shape: Heart shape, bone shape, circle, triangle, small fish shape. And then, square shape, sandwich shape.

Raw Material: Corn flour, soybean flour, wheat bran. At the

same time, meat and cereal flour, etc.

Advantages Of Automatic Pet Feed Production Line

1	And then, the stainless steel dry pet dog food equipment extruder machine is composed of feeding system. At the same time, the extrusion system, rotary cutting system, heating system, transmission system and control system.
2	At the same time, adopt advanced screw extrusion technology.
3	And then, pet feed making machine uses high temperature and high pressure to mature and expand the material, complete at one time.
4	At the same time, the main engine adopts frequency conversion speed regulation to ensure the stability of the production process.
5	And then, the products are colorful, diverse in variety, beautiful in appearance, natural and lifelike. At the same time, delicate in texture and widely used in raw materials.
6	At the same time, dog food suitable for dogs at different growth stages. And then, the dog food production line after changing the mold. At the same time, it can make dog food of different shapes.

7

At the same time, all machines in this dog cat food production line are made of stainless steel plates. And then, it can ensure food safety.
