

How Much Does It Cost To Make Biscuits?

Biscuits are a very important snack. They are sold in major stores and have a very wide audience. Many people like to eat biscuits very much. And the sales of biscuits continue to increase. Although the biscuits are very delicious, some biscuits are more expensive.

Therefore, many baking enthusiasts want to make their own biscuits. If you make your own biscuits, you can decide taste you like and eat them with real ingredients, so how much does it cost to make your own biscuits?

There are many things that need to be prepared when making biscuits. First of all, there are various appliances, such as ovens, cutting boards, rolling pins, etc. The cost of electrical appliances is relatively high. Of course, many households already have various electrical appliances. So the

prices of electrical appliances and containers cannot be the same, so you can buy them according to your actual situation.

The second is the preparation of various raw materials. The raw materials used in making biscuits are flour, sugar, butter, and condensed milk. These raw materials can be bought in stores, and the price is not expensive. You can buy them at about \$ 9.60. And these ingredients can make about 100 biscuits.

The above are the essentials when making biscuits. The minimum cost is about \$ 9.60. Of course, if you want to make the biscuits look richer, you can add some other ingredients, such as strawberry jam, salted peanuts, chocolate chips, coconut and corn flakes, etc., but in this case, the cost of raw materials will rise.

The process is also very simple, mix the flour and sugar together, then cut the butter into small pieces, stir it into the flour, and finally add condensed milk or milk and mix the flour into a dough, then take it out onto the board and slowly knead it into a smooth dough.

After that, use a rolling pin to roll it into an even thickness of pancakes, and finally use a knife to cut it into the desired shape, then we can give full play to our imagination and add some decorations to the cookies, cornflakes, oatmeal, etc.

The above is the way to make biscuits by yourself. For manufacturers who want to make biscuits, the [biscuit production line](#) is a big investment.
