

Industrial Tunnel Automatic Microwave Rice Power Grain Power Drying and Sterilizing Machine

Introduction to the Industrial Tunnel Automatic Microwave Rice Power Grain Power Drying and Sterilizing Machine

The Industrial Tunnel Automatic Microwave Rice Power Grain Power Drying and Sterilizing Machine is a new generation microwave drying and sterilizing machine that adopts the tunnel drying method to dry and sterilize the rice. This machine has a unique structure, which can dry and sterilize the rice quickly and evenly, without affecting its flavor or

nutritional value. It is also able to produce high-quality dried rice products with low energy consumption.

Applications of the Industrial Tunnel Automatic Microwave Rice Power Grain Power Drying and Sterilizing Machine

The automatic microwave rice power grain power drying and sterilizing machine is a new type of industrial equipment that has been newly developed and applied in the food industry. The main features of this machine are as follows: 1) It adopts high-frequency energy to dry and sterilize rice; 2) Its drying rate is very high, so it can quickly dry the wet rice grains and achieve good quality rice products with low labor intensity; 3) The sterilization effect is very good, so it can effectively prevent the growth of microorganisms in the rice products. In general, this machine has great potential for applications in various fields such as bakery, confectionery, beverage, instant noodles etc.

Specifications of the Industrial Tunnel Automatic Microwave Rice Power Grain Power Drying and Sterilizing Machine

1. Brief introduction of the industrial tunnel automatic microwave rice power grain power drying and sterilizing machine
2. Technical specifications of the industrial tunnel automatic microwave rice power grain power drying and sterilizing machine

3. Comparison of the industrial tunnel automatic microwave rice power grain power drying and sterilizing machine with other machines

4. Applications of the industrial tunnel automatic microwave rice power grain power drying and sterilizing machine

The industrial tunnel automatic microwave rice power grain power drying and sterilizing machine is a kind of new generation dryer and sterilizer, which adopts the unique microwave heating technology for drying and sterilization. It has excellent performance in controlling moisture, preserving food quality, and improving storage life. The main features of this machine are as follows:

1. The industrial tunnel automatic microwave rice power grain power drying and sterilizing machine adopts the unique microwave heating technology for drying and sterilization. It has excellent performance in controlling moisture, preserving food quality, and improving storage life.

2. The industrial tunnel automatic microwave rice power grain power drying and sterilizing machine is designed with single cabinet structure to save space. It also has compact structure to fit small spaces easily.

3. The industrial tunnel automatic microwave rice power grain power drying and sterilizing machine has high speed of 600r/min for efficient working.
