

Nutritious and delicious nutrition bar production line

Introduction

In recent years, with the escalation of health awareness, consumers' views on snacks have undergone tremendous changes. Consumers are now looking for foods that are nutritious and healthier. The high-calorie and high-fat snacks that are common to office workers are gradually replaced by snacks with "natural, nutritious, and low-fat" labels. Brown rice rolls, daily nuts, and nutrition bars that advertise health have become the new favorites of modern people. Nutrition bars can improve people's satiety, thereby reducing people's desire for other foods, which to a certain extent also reduces people's food intake, and in a sense achieves the goal of weight loss.

The Production Line Details

Capacity	2.5T/Shift
Electricity supply	Customized according to your local electricity situation.
Machine details	1. Stainless steel,:201, 304, 316, on request. 2. Electrical components can be ABB, Delta, Fuji, Siemens; famous brands.
Certificates	CE,GOST,TUV,BV
Raw material	Rice, Millet, Sugar, Eggs,Flour
Product colour	Various color

Feature Of Nutrition Cereal Grain Bar:

1. High degree of automation: The bread crumb production line has a very high degree of automation, which can well meet the needs of customers and fully meet the needs of various enterprises.
2. Large output: It can realize multiple batch processing, thus avoiding problems such as equipment downtime and long downtime due to different batches. The output of the equipment is large, thus ensuring the production efficiency and quality. At the same time, the production speed of the equipment is fast, and the output can be adjusted at any time according to the output needs of different users.
3. Low energy consumption: It can effectively reduce the utilization rate of energy and achieve the purpose of saving costs.
4. Sanitation and cleaning: The equipment adopts a new type of dust removal equipment, which can well avoid dust pollution to the surrounding environment and ensure environmental hygiene. In the process of processing, a certain amount of dust will be generated. If the dust is not effectively removed, the dust will cause harm to the health of the workers.
5. Easy to operate: The device is easy to operate and easy to use, whether it is a small-scale enterprise or a large-scale enterprise, it can be easily used.

The above are the characteristics of the bread crumb production line. This equipment has the advantages of large output, high efficiency and low energy consumption, and can

meet the needs of various customers.

Applications Of Nutrition Cereal Grain Bar:

The nutritional bar production line is very versatile. In addition to being used in the production of nutritional bars, it can also be used in the production of various foods such as rice crackers, corn crisps, black rice crisps, and brown rice crisps.
