

High quality pet feed production lines

Introduction of pet food

Dog food is a special nutritional food for dogs, a high-grade animal food between human food and traditional livestock and poultry feed. Its role is to provide dogs with the most basic nutrients needed for life, growth and health. It has the advantages of comprehensive nutrition, high digestion and absorption rate, scientific formulation, quality standard, easy feeding and prevention of certain diseases. It is broadly divided into two categories: puffed food and steamed food. Our company mainly makes puffed grains.

Animal feed: Animal feed is a type of feed that comes from the animal body. This type of feed is rich and abundant in protein and contains a full range of essential amino acids, as well as iron and B vitamins, and is rich in fibre and easy to digest, making it the most palatable feed for dogs.

The whole pet food production line includes Mixing, Screw conveyor, Twin Screw Extruder, Air Conveyor, Multi-layer Oven, Flavoring Line

The Production Line Details

Capacity	120-150KG/h; 200-250KG/h; 300-500KG/h
----------	---------------------------------------

Electricity supply	Customized according to your local electricity situation.
Machine details	1. Stainless steel, :201, 304, 316, on request. 2. Electrical components can be ABB, Delta, Fuji, Siemens; famous brands.
Certificates	CE,GOST,TUV,BV
Raw material	Flour, Bone Meal, Corn Meal, Bean Meal
Product colour	Brown, Green, Pink, Yellow and so on

Flow Chart of Pet And Animal Food Making Machine:

Feature Of Pet And Animal Food Making Machine:

1. Fully functional equipment: The most basic function of the pet production line is to produce different types of

products, such as cat food, dog food, canned cat food, etc. According to different types of products, the machine can adjust the production parameters according to customer requirements, so as to meet the different needs of customers.

2. Advanced technology: In the process of pet food processing, the advanced degree of technology directly affects the quality of pet food, pet food production line with advanced technology can reduce product quality problems in the production process.
3. Reliable quality: The pet food production line adopts advanced equipment, and has undergone strict testing from the selection of raw materials to the packaging of finished products. The equipment includes feeding system, mixing system, extrusion system, conveying system, etc. Each part has strict control procedures to ensure that the products produced meet the quality requirements. In terms of quality management, the equipment is equipped with an online monitoring device and a computer control system, which can monitor the operation of the equipment in real time and ensure product quality.
4. Safety and environmental protection: The product quality of the pet food production line is also closely related to the safety of the environment. To this end, we have adopted high-quality, high-standard production technology, and adopted advanced technology and equipment in raw materials, processing, packaging, etc., to avoid adverse effects on pet food caused by the use of inferior raw materials and equipment, Effectively guarantee the safety and environmental protection in the pet food production process.

Applications Of Pet And Animal Food Making Machine:

Our pet feed production line is mainly used in the production of various pet feeds. Through the control of temperature and moisture, we can produce feeds with novel shapes, unique tastes and rich nutrition.

Our pet feed production line can be used to produce dog food, cat food, fish feed, shrimp feed and various aquatic feed, parrot feed and so on.

Why choose us?

1, we have our own factory, the price is relatively low, which helps you save costs; we have our own factory, which means that our quality is guaranteed and all machines are produced by us;

2, we have a complete pre-sales and after-sales service, before the machine is shipped, we will carry out a strict inspection of the machine to ensure that the machine does not suffer any damage, and the machine is packed tightly to prevent rusting at sea; we have a complete after-sales team, if you have any problems in the use of do not understand, you can ask our after-sales team

Installation of the machine: If you do not know how to install the machine, our factory side will send a special engineer to your country to install the machine.

4. Choosing us means that your small contribution will be highly rewarded.
