

High Automation Spaghetti Pasta Macaroni Production Line 380V/50Hz, CE Approved

HIGH AUTOMATIC PASTA MACARONI MAKING MACHINE'S DESCRIPTION:

The High Automatic pasta making machine adopts samolina flour, wheat flour, potato starch, potato powder, and corn starch as main materials, to produce a variety of frying & boiling food in different shapes, which are popular in the market, such as crisp pea, shell, screw, square tube, round tube, and wave. The Pasta macaroni production line is characterized by unique technique, rational configuration, high automation and stable performance.

Our Company has improved the Pasta macaroni production line performance by means of the marketing research and our own technology to make the operator operate the equipment easily. Besides, we have made the craft more perfect. The Pasta macaroni production line is indispensable production food equipment for everyone taking on the food industry. We hope that we can provide more opportunity and wealth for you.

2. Flow Chart of HIGH AUTOMATIC PASTA MACARONI MAKING MACHINE

:

1).Mixer→ 2).Screw Conveyor→ 3).Single Screw Extruder→ 4).Pulling And Cutting Machine→ 5).Hoister→ 6).Multi-Layer Dryer→ 7).Cooling Conveyor

3.Machine details of HIGH AUTOMATIC PASTA MACARONI MAKING MACHINE:

1). Single screw extruder:

Function:	Features:
1.Specially decide single-screw system extrude and form the raw material into different sizes and shapes.	1.Screw material is 38CrMoAl with nitriding treatment, the hardness is 60HRC.

<p>2. Controlling system, feeding system, extruding system, heating system, water cooling system, cutting system, lubricating, system.</p>	<p>2. Barrel material is alloy steel, hardness is 52HRC.</p>
	<p>3. The gear box has forced lubrication system.</p>
	<p>4. All the motor is controlled by investor, which can save power and protect the extruder.</p>

2). Cooling Conveyor:

- 1□ Stainless steel mesh belt.
- 2□ Support system and protecting plate are made by stainless steel.
- 3□ Four fans forced cooling.
- 4□ The cooled products are convenient for packing.

3) .Dryer:

<p>1. The dryer has the compact structure, small occupying, large drying area, small surface area, slight radiating heat and high thermal efficiency.</p>
<p>2. The belt and the heat preservation use the stainless steel; it is suitable for food industry.</p>
<p>3. The running speed of belt net can be controlled (frequency)</p>
<p>4. The temperature can be controlled willfully and designed according to the need.</p>

5. Material touching the food is stainless steel, bracket is iron with paint. Motor is Chinese famous brand, Switch board operation.

4. Technical Advantages of HIGH AUTOMATIC PASTA MACARONI MAKING MACHINE:

1). Compact structure novel design and stable performance, developed on the base of like produces and requirements in the world market.

2).

It realizes high automation, convenient operation, low energy and small floor space, that assures all working procedures from feeding flour to finished once.

3).

The investment for this line is only one tenth of that larger size equipment , especially suitable to small-size or self-owned enterprise.

5. Sample Pictures of our production:

6. Our service:

<p>1. Providing Production formula, installation, debugging, operator training services, professional engineers provide machine installation, training, enterprise employees, solve problem, long time for machine maintenance.</p>
<p>2. Professional machine maintenance and services. The warranty time of machine and parts is 1 year. Long time maintenance service for spare parts, components.</p>
<p>3. Perfect product quality tracking system after sale, establish a complete product quality tracking report for every customer, professional analyze, timely feedback.</p>
<p>4. To design and supply non-standard products according to the customer request.</p>
<p>5. For the sake of the global customer, we provide equipment and technology, raw material, packing, etc. Comprehensive consulting service, let customer worry-free truly.</p>

We promise:

Pre-sale services	Services during the sales	After-sale services
<p>1). Provide professional advisory services</p>	<p>1). Confirm every terms and details and sign contract with customers</p>	<p>1). Provide installation, commissioning and training</p>

2).Communicating with customer and learn your requirement	2).Inspect the machine before leaving the factory.	2). Provide necessary technical support and update information
3).Welcome to visit our factory	3).Packing machines and delivery on time	

FAQ:

Question	Answer
Are you a trade company?	Our company is in an integrated set of industry and trade company.
Do you provide the formula to the customers?	Yes, we usually provide the formula for our customers and other services.
Which machine can be selected for the customer?	We can provide the customized services according to our customers' demands.
What is the applicable voltage and frequency of the whole production line?	We can according our customer's local voltage to provide the customized services.
Do you provide the samples?	Yes. We can provide the samples for our customers. Also we are welcome our customers can visit our factory.

How about the after-services?	We have the professional after-services department to deal with all kinds of problems from our customers and offer all kinds of services for our customers.
-------------------------------	---

Packing and delivery

- Inside package is plastic film, outside is wooden or plywood case(based on the customer's need).
- Only plastic film nude packing with wooden pallet.
- We can supply fumigation package and certificate.
- Shipping, train, express or upon clients' demands.
