

Automatic Wafer Making Machine

As a professional manufacturer of automatic wafer biscuit production line, our company has developed a multifunctional fully automatic wafer making machine after years of development. The fully [automatic wafer making machine](#) is novel in design and compact in structure. Full automatic industrial wafer machine for sale from raw materials to finished products is fully automatic and has a high degree of automation.

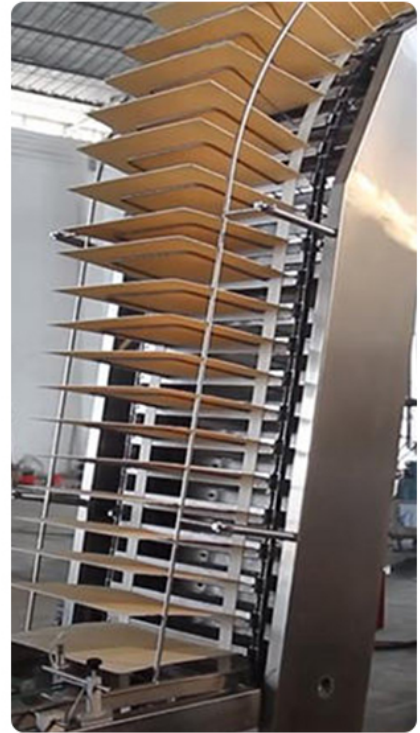

What Is Automatic Wafer Making Machine

Full automatic wafer making machine is designed and manufactured according to the facts of domestic biscuit manufacturing industry and absorbing the most well-known wafer production lines of many oversea manufacturers, which features reliable performance, compact structure, small occupation, high yield, lower energy consumption, convenient maintenance, simple operation. Automatic wafer making machine consists of baking oven, cooling tower, sheet picking machine, cream spreading machine, cooling cabinet, cutting machine, batter mixer, cream mixer and smash machine. The driven motors adopt SEW Germany, the bearings use SKF France. Automatic wafer making machine has operating system that uses PLC programming to make the process automated and easy control.

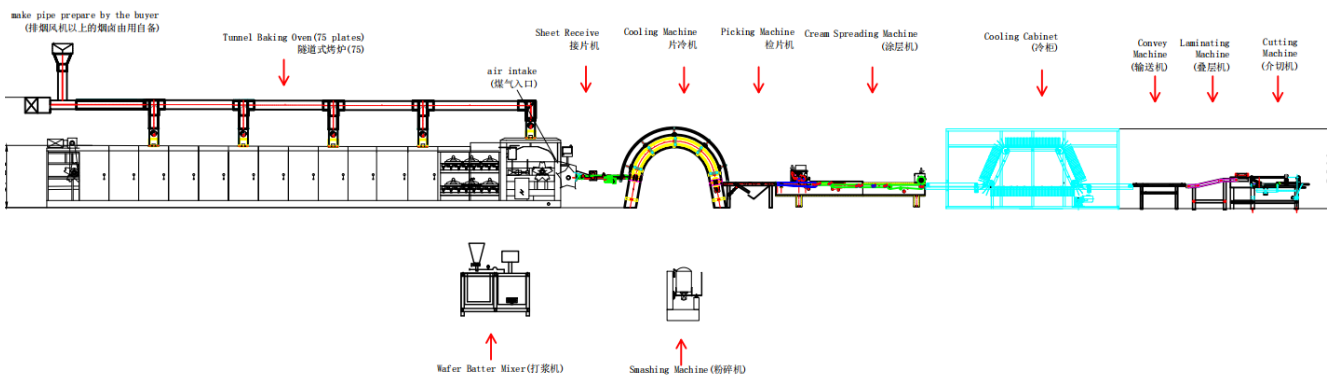

Technical Parameters of Wafer Biscuit Processing Line

Technical Parameters of Wafer Biscuit Processing Line	
Capacity	10.0 tons(24 hours)
Power supply requirement	380V, 50HZ
Motor power of automatic wafer making machine	63.0KW
LPG consumption	23kg/h
Natural Gas consumption	20-30 m ³ / h
Baking time/Baking speed	90seconds
Baking plate size of automatic wafer making machine	470*325mm
Complete line dimension (L×W×H):	46.5m×5.0m×2.5m
hollow wafer machine gross weight	20 tons

How To Use The Automatic Wafer Making Machine

Main Equipment List Of Automatic Wafer Making Machine	
1	Batter Mixer for the Wafer Biscuit Dough
2	Wafer Baking Oven ,Different Model according to Different Capacity
3	Sheet Received Machine For Wafer sheets from Oven
4	Horizontal or Vertical Door Cooling Tower of Automatic Wafer Making Machine
5	Sheet Picking Machine For Wafer Sheets from Cooling Tower
6	Cream spreading machine with roller heating system, One Color(cream or chocolate available)
7	Cooling Cabinet&Cooling Compressor of Automatic Wafer Making Machine
8	Sheets Laminated Machine , Sheets Laminated Machine
9	Cutting Machine, Knife cut type
10	Cream Mixer For Cream or Chocolate
11	Smash Machine For Recycle
12	Chocolate Coating Machine with Cooling Tunnel
13	Wafer Packing System of Automatic Wafer Making Machine

How Is Advantages Of Multi-Functional Automatic Wafer Production Line

Advantages Of Professional Automatic Wafer Making Machine	
1	Automatic wafer making machine can easy to operate.
2	Commercial wafer making machine can save energy and labor
3	Fully automatic wafer making machine have no noise, no pollution.
4	Wafer biscuit processing line has fully automatic and improve production efficiency.
5	Continuous production, no material loss and save cost.

Production Features Of Automatic Commercial Chocolate Wafer Processing Line

Production Features Of Automatic Wafer Making Machine	
1	The whole wafer process is fully automatic including depositing, mould plate vibrating, cooling, demoulding , conveying and plate heating.
2	The commercial automatic wafer making machine can be customized as your requirements
3	Our package by wooden box or pallet or carton box according to requirement and shipped by sea from Qingdao port.
4	Our gas baking oven has model-27,33,39,45,51,63,75 plates for your option.
5	The gas system of automatic wafer making machine adopt Italy brand.
6	The wafer stick production line/ chocolate wafer biscuit making machine/ wafer line is used for wafer biscuit forming.

Commercial Wafer Samples

This automatic wafer making machine is mainly used to produce wafer biscuits, such as Sandwich wafer, Coating wafer , Wafer volume and so on.

Which Market Did The Loyal Wafer Biscuit Making Equipment Sold?

The technology of wafer biscuit production line is advanced, we can introduce how wafer biscuit is made. The wafer biscuit production line is a new generation of products designed and developed in combination with the advanced structure of similar products at home and abroad. At present, the machinery of loyal automatic wafer making machine has been exported to Singapore, Nigeria, India, Canada, Brazil, Russia, Belgium, Liberia, Morocco, South Africa, South Korea, Bangladesh, United Kingdom, Western Europe and other countries and regions, which has promoted the development of local economy.

Customer Case Of Small Scale Automatic Wafer Making Machine At 2021	
1	100KG/H Thai fully automatic chocolate wafer production line for Thailand customer
2	100KG/H small scale automatic wafer making machine for sale in Singapore
3	100KG/H fully automatic wafer making machine for sale in Nigeria
Customer Case Of Industrial Automatic Biscuit Production Line At 2021	
1	Industrial wafer biscuit making machine fully automatic 1000KG/H in Algerian
2	800KG/H industrial wafer fully automatic wafer making machine for sale in Canada
3	1000KG/H industrial biscuit making machine buy online sold in Russia
Customer Have Raw Material Case Of Automatic Wafer Production Line At 2021	

1	500KG/H industrial wafer chocolate biscuit making machine for sale in Bolivia
2	United Kingdom 600KG/H industrial automatic wafer making machine
3	1000KG/H fully automatic automatic wafer chocolate biscuit production line for sale in Belgium
